

MEDIA ADVISORY

Cardinal Health highlights cell & gene “white glove delivery” solutions at Advanced Therapies Week 2025

DUBLIN, Ohio – Jan.16, 2025 – Cardinal Health™ Nuclear & Precision Health Solutions (NPHS) will attend Advanced Therapies Week 2025 in Dallas, TX, January 20-23, 2025, and feature its cell & gene white glove delivery capabilities.

WHAT: Visitors to the Cardinal Health™ booth at Advanced Therapies Week 2025 will learn about the company’s ability to offer bespoke, tailored, end-to-end therapeutic product delivery support for cell & gene therapy including upfront cell collection logistics management, kitting, supply procurement and more.

The Cardinal Health booth (#629) will highlight information about how NPHS can:

- Remove friction in the cell & gene supply chain through its healthcare focused delivery infrastructure, including a dedicated vehicle fleet and 1,700 trained delivery personnel. Cardinal Health can reach 95% of hospitals within three hours and has established relationships at more than 6,600 clinical locations, helping ensure the right dose gets to the right patient at the right time.
- Increase flexibility with local pharmacy depot staging days prior to treatment, allowing for just-in-time delivery of treatments.
- Help support to market and commercial scale up through best-in-class, tailored end-to-end solutions.

To learn more, visit the [NPHS website](#).

WHEN: January 20-23, 2025
9 a.m. – 5 p.m.
